

### 1. Allowing form submission by providing a prefix without a number

2. Environment: <https://qa-training.sbx.devsquad.app/>

### 3. How to Reproduce:

Fill in mandatory fields > Provide prefix > Do not provide phone number > Submit form

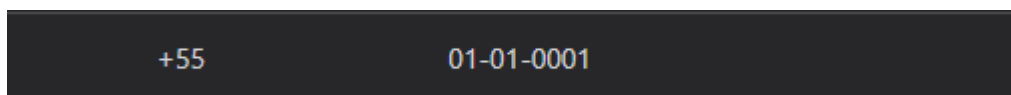

### 4. What Should Happen:

- The form should not allow submission if the phone field is not properly filled out.

### 5. What Happened :

- When submitting the form without providing a phone number, the information is saved without a phone number filled out.

### 6. Evidence:

### 1. Allowing form submission by providing an invalid date field

2. Environment: <https://qa-training.sbx.devsquad.app/>

### 3. How to Reproduce:

Fill in mandatory fields > Provide invalid date field > Submit form

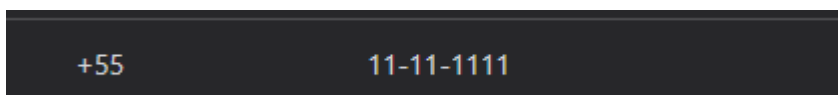

### 4. Expected Behavior:

- The form should not allow submission if the date field is not properly filled out.

### 5. What Happened:

- The application allows form submission with an invalid date filled out.

### 6. Evidências:

### 1. Allowing form submission by providing an invalid email field

2. Environment: <https://qa-training.sbx.devsquad.app/>

### 3. How to Reproduce:

Fill in mandatory fields > Provide invalid email field > Submit form

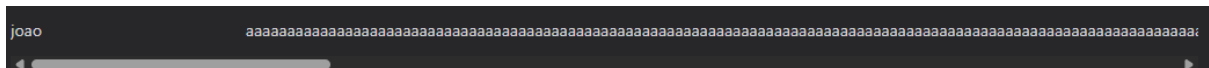

### 4. Expected Behavior:

- The form should be filled out correctly, following a standard, and not allow submission with an invalid email.

### 5. What Happened:

- It is allowed to submit the form with an invalid email field.

### 6. Evidence:

### 1. Allowing form submission by providing an invalid email field

2. Environment: <https://qa-training.sbx.devsquad.app/>

### 3. How to Reproduce:

Fill in mandatory fields > Select Client Type

### 4. Expected Behavior:

- When selecting Client Type as individual, the option should remain.

### 5. What Happened:

- When Client Type is selected as an individual, the option automatically changes to Business, but when the Business field is selected, the field is not selected.

### 6. Evidence:

### 1. State field not consistent with the selected Country field

2. Environment: <https://qa-training.sbx.devsquad.app/>

### 3. How to Reproduce:

Fill in mandatory fields > Select country field > Select state field

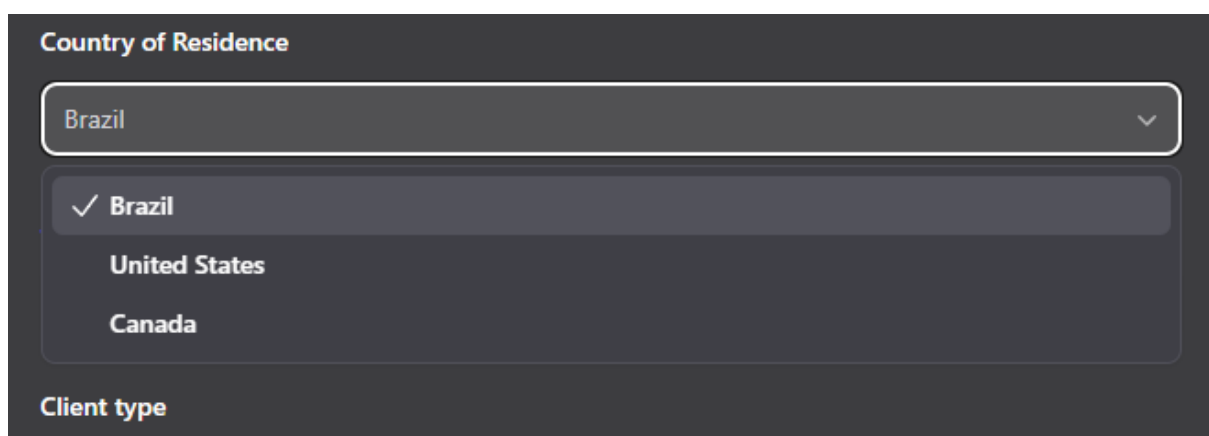

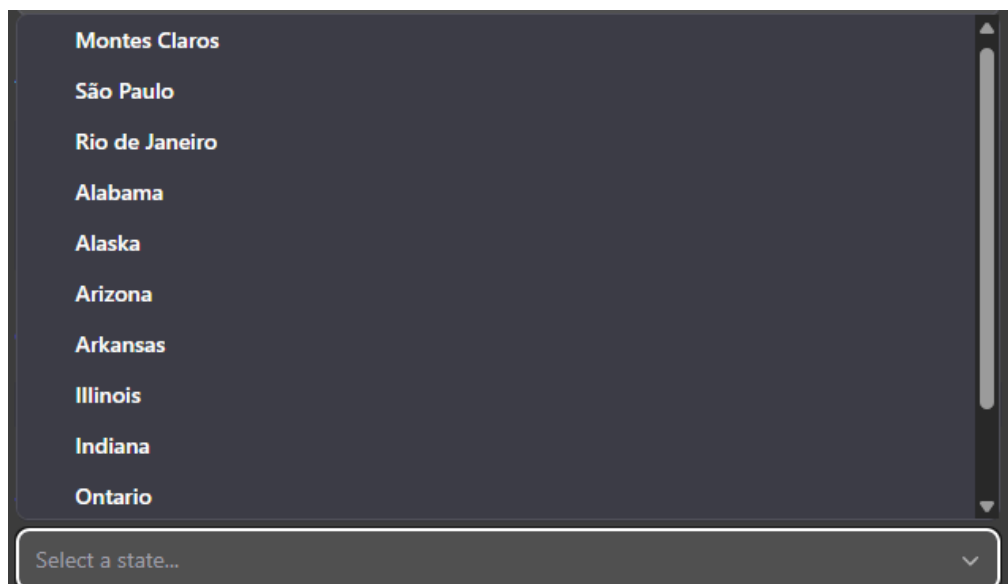

### 4. Expected Behavior:

- When the country is entered, the states consistent with each country are displayed

### 5.What Happened:

- When selecting the country of residence, when entering the state, locations that are not consistent with the selected country are presented.

### 6. Evidence:

**1. It is allowed to submit the form without filling in Client Type**

**2.Environment:** <https://qa-training.sbx.devsquad.app/>

**3. How to Reproduce:**

Fill in mandatory fields > Do not fill in Client Type fields > Submit form

**4. Expected Behavior:**

- If Client Type has not been filled in, form submission should not be allowed.

**5. What Happened:**

- When the Client Type field is not filled in, form submission is allowed.

**6. Evidence:**

**1. Form saved without agreeing to Terms and Guidelines**

**2.Environment:** <https://qa-training.sbx.devsquad.app/>

**3. How to Reproduce:**

Fill in mandatory fields > Do not fill in the terms field > Submit Form

**4. Expected Behavior:**

- It should not be allowed to submit the form without agreeing to the terms and guidelines.

**5. What Happened:**

- It is allowed to submit the form without filling in the terms and guidelines acceptance field.

### 1. Form accepts invalid values for annual income fields

2. Environment: <https://qa-training.sbx.devsquad.app/>

### 3. How to Reproduce:

Fill in mandatory fields > Provide invalid annual income field > Submit form

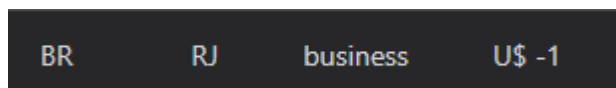

### 4. Expected Behavior:

- It should not be possible to enter negative values.

### 5. What Happened:

- When entering negative values, the information is saved.

### 6. Evidence:

A dark-themed form with four input fields. The first field contains 'BR', the second 'RJ', the third 'business', and the fourth 'U\$ -1'.

### 1. When an error message is displayed, the field disappears and does not return

2. Environment: <https://qa-training.sbx.devsquad.app/>

### 3. How to Reproduce:

Fill in mandatory fields > Do not fill in State field > Submit form > Return to error message

### 4. Expected Behavior:

- When the field is filled in incorrectly, an error message should be displayed without removing the second field.

### 5. What Happened:

- When an error message returns in the State and Country fields, the field disappears when the error message returns.

### 6. Evidence:

A dark-themed form with a label 'State' above a dropdown menu. The dropdown menu shows 'São Paulo' with a downward arrow. Below the dropdown, there is a red error message: '⚠ The state field is required.'

**Improvement tips:**

- Record listing can have the option to reverse order, from most recent to oldest and vice versa;
- Validation, do not allow entering the same name more than once;
- Validation, do not enter the same phone number more than once;
- Validation, do not enter the same email more than once;
- Split address field, so that address and zip code fields can be entered separately.
